PROJECTS

Diabetes Predication - using machine learning **Python**

- Diabetes prediction using machine learning techniques is a crucial area of research and has the potential to revolutionize healthcare.
- Machine learning algorithms can analyze vast amounts of patient data, including medical history, lifestyle choices, genetics, and environmental factors, to identify patterns and correlations that humans might miss.
- machine learning techniques for diabetes prediction holds great promise in transforming diabetes care by enabling early detection, personalized interventions, and better patient outcomes.

Hotel Management System - using Android Studio, Java, Sql **Android**

- The Android app developed in Android Studio with Java offers an intuitive and user-friendly interface for both hotel staff and guests, making it easy to navigate and use.
- The Hotel Management System can significantly improve hotel operations, guest satisfaction, and staff productivity, ultimately leading to a successful and well-organized hospitality business.
